

**TO: COMPANY ANNOUNCEMENTS OFFICE ASX LIMITED**

**DATE: 22 May 2019**

---

## **Appointment of Non-Executive Chairman**

---

Cohiba Minerals Limited ('Cohiba' or 'the Company') is pleased to announce the appointment of Mr Avrohom (Avi) Kimelman as Non - Executive Director and Chairman of Cohiba Minerals Limited.

Avi was instrumental in bringing Olympic Domain to the company, and negotiated the asset's terms in its early stages. Now that the final stages of the application process for drill sites is underway and the Company has been approached by numerous parties to consider working together, we believe it is the optimum time for Mr Kimelman to join the board and assist with this.

Avi is one of the largest individual shareholders in the company. He has been a director of a number of publicly listed and unlisted companies and during that time, has engaged with multiple sectors, including Mining Exploration and production, Property Development and Investment, Technology, Education. He has directly assisted in raising millions of dollars in capital, mergers and acquisitions, initial public offerings and reverse takeovers for various ASX listed companies and unlisted property syndicates. Avi is currently the CEO of Nova Minerals Limited (NVA).

It is noted that current Chairman, Mr Mordechai Benedikt, will remain on the Board as an Executive Director.

At the same time, Romy Hershman has been appointed joint Company Secretary. Romy is in the final stage of completing a Bachelor of Law (Hons) and Arts at Monash University and has successfully completed a certificate in Governance Practice (Company Secretary) at the Governance Institute of Australia.

*Avi commented "I'm pleased to join the board in this transformational period and look forward to progressing drilling at the company's world class Olympic Domain project portfolio situated in Australia's premier IOCG belt as the company has vectored into targets with similarities to BHP's Oak Dam West discovery. I further look forward to monetising the company's non-core assets and streamlining the low capex Gypsum project located within the Esperance wheat belt to potential early cash flow."*

Ends.
